BIOREMEDIATING parts washing system

## FAQ

### QUESTION What is the big deal with Bioremediation?

#### ANSWER

Bioremediation is unique in the fact that it significantly reduces your waste output and associated disposal cost whilst maintaining the efficacy of your fluid.

Special microbes (called Ozzy's) eat the oil, grease and other contaminants that comes off your parts so that your fluid will remain clean AND just as effective for the next time you use it. Unlike other conventional parts washing solutions, bioremediation will ensure the **BEST** cleaning performance with the **LEAST** impact on efficiency, users and the environment. If you want to learn more about bioremediation, I can send you some resources specifically on this?

### QUESTION Does water-based technology work as well as solvents?

#### ANSWER

Using advanced chemistry, CRC has been able to replicate and, in many cases, improve on the current performance of solvents.

You will be amazed by the performance of CRC's water-based formulas. Users all round the world are converting to SmartWasher with no regrets; the only regret is they didn't change sooner.

### STATEMENT We already have a cleaning system...

#### ANSWER

Modern cleaning systems need to meet the "full" needs of your business.

SmartWasher offers:

- » Safe for users: non-flammable and no contact with harmful solvents
- » A true sustainable cleaning system: the bioremediation process keeps the fluid clean and ready to use
- » Better for the environment: no hazardous waste
- » Less spending: eliminates hazardous waste removal contracts

### STATEMENT I already have a cleaning contract with my current provider...

#### ANSWER

We can assist you with looking at your current contracts, agreements and obligations to come up with a solution that benefits you.

### QUESTION How can I be sure the SmartWasher will deliver a comparable cleaning solution to what I already have?

#### ANSWER

SmartWasher will meet the needs of your current requirements. Used all over the world, in almost every industrial application. CRC has been delivering solutions for over 60 years and backs the quality and effectiveness of all their products.

CRC offers a **FREE** trial to ensure you are more than satisfied with SmartWasher. This is the future of parts washing technologies and will drive you to a more sustainable, safe and effective workplace.
